Awards

Nov 2023 | Young Researcher

Honourable Mention - Exploring Emotions: Play-Based Interventions for Children with Autism Spectrum Disorders

Nov 2022 | Honeywell TeChallenge

Honourable Mention - Indoor Air Quality Monitoring System

Nov 2022 | Young Researcher

Honourable Mention - Radiological Diagnosis of SARS-CoV-2 Infected Patients by Automated Classification of Chest Radiographs using DTL

Experience

2023 - 2024
Romanian Academy of Sciences

Medical Engineer | Researcher

I was part of a research project titled AI-Based System for Evaluating the Psychophysiological Response of the Human Body to Stress. My main responsibilities included extracting relevant features from ECG and GSR signals to identify physiological patterns associated with stress.

2021 - 2024
Wing Computer Group

Medical Engineer | Researcher

I was part of an interdisciplinary research team focused on developing an Intelligent System for the Automatic Assessment and Interpretation of Disguised Behaviour in Critical Infrastructure Personnel. My responsibilities included the acquisition, preprocessing, and analysis of multimodal physiological signals, building and augmenting datasets for machine learning, as well as developing, training, and optimizing ML models for signal classification and emotion recognition.

2021 - 2024
Arc-Rom Trading

IT Support & Digital Operations

Managed the company website and online presence (updates, product listings, promotions) and provided day-to-day IT support. Worked cross-functionally on sales administration (offers, orders, invoices/dispatch notes), primary accounting records, inventory and deliveries, and internal/external document archiving.

Education

2024 - 2026
Devmind

Java Software Development | Backend & Full-Stack

Completed two intensive professional training programs (1,130 hours):

Junior Backend Developer: Core Java, OOP, Data Structures, Multithreading, SQL & JDBC.

Full-Stack Developer: Spring Boot, REST APIs, JPA/Hibernate, React, Docker & CI/CD.

2022 - 2027
University POLITEHNICA of Bucharest

PhD - Artificial Intelligence-Based Human Attention Assessment Systems

Skills: Artificial Intelligence · Signal Processing · Python · PyTorch · Research

2020 - 2022
University POLITEHNICA of Bucharest

MEng - Faculty of Medical Engineering

Skills: Artificial Intelligence · Deep Learning · Signal Processing · Python · PyTorch · 3D Slicer · Research

2016 - 2020
University POLITEHNICA of Bucharest

BEng - Faculty of Medical Engineering

Skills: Artificial Intelligence · Machine Learning · Signal Processing · Python · MATLAB · Simulink · LabVIEW · Arduino IDE · Research
